

ATLANTIC TM COOLUBE GREASE

DESCRIPTION

ATLANTIC COOLUBE grease is a premium quality, multi-purpose, non-soap grease. It gives better lubrication in more applications, wet or dry, over a wider temperature range (-40F to 400F), and for longer periods of time than ordinary soap-base greases.

ATLANTIC COOLUBE is a truly multi-purpose grease. Because of its excellent stability and its E.P. characteristics, it will remain on all metal and bearing surfaces longer than most ordinary greases. Formulated not to melt or run out of bearings even at higher temperatures.

USAGE

ATLANTIC COOLUBE is specifically formulated for use on anti-friction bearings, journals and all general greasing; where a single multi-purpose lubricant is desired for economy, simplification of inventory and general greasing of equipment. Some typical applications include fans, blowers, pumps, conveyor bearings, ball bearings, journal bearings, roller bearings, universal joints and all other lubrication points having sliding or rolling friction which require a multi-purpose grease.

ADVANTAGES

M Wide Temperature Range M Reduced Wear
M Extremely Water Resistant M Non-Melting
M Low Coefficient of Friction M Prevents Rust and Corrosion

PACKAGE AVAILABILITY

Convenient disposable gun-loaded 14 oz. Cartridges
5 gal. Pail, 15 gal. Keg and 55 gal. Drum

DESCRIPTION ATLANTIC Product: COOLUBE

Color: Green
Base Oil: Petroleum
Thickener: Synthetic
Texture: Buttery
