

ATLANTIC TM No.4 VALVE LUBRICANT & SEALANT

DESCRIPTION

ATLANTIC No. 4 VALVE LUBRICANT & SEALANT is formulated of the finest synthetic base fluids, thickeners and additives. It is engineered to produce effective valve lubrication and sealing under extremely corrosive conditions. This property allows the ATLANTIC No.4 VALVE LUBRICANT & SEALANT to be very effective in a broad range of applications.

USAGE

ATLANTIC No.4 VALVE LUBRICANT & SEALANT is designed for all lubricated valves in acid, caustic, or their aqueous solutions. It is resistant to sulfuric acid, caustic soda, brine, fatty acids, ammonia, and other severe service conditions.

ADVANTAGES

- MChemically Resistant
- MVersatile—Broad Range of Applications
- MReduced Lubrication Cycles
- MReduced Valve Corrosion
- MNon-Toxic

TYPICAL SPECIFICATIONS

Color Amber
Texture Smooth & Tenacious
Service Temperature 0 F to 500 F
Base Fluids Synthetic
Lubricating Solids Micro Fine PTFE Particles

PACKAGE AVAILABILITY

5 qt. Can, 5 gal. Pail, and 15 gal. Keg
J & K gun size Sticks
Small Sticks for screw type lubricators
